

AIRCRAFT SERVICES

One of the leading global MRO service providers

Around 500 customers worldwide

Comprehensive solutions for the technical support and management of aircraft fleets, engines and components

Growing international network of operations and sales offices

Headquarters in Zurich, Switzerland

Majority owned by Mubadala Development Company

80 years of experience in aircraft maintenance

Over 1,000 checks and modifications carried out each year

Highly specialized own aircraft maintenance workshops

Innovative concepts and services proven to reduce TAT

SR TECHNICS AT A GLANCE

A strong partner dedicated to your success

SR Technics is a leading airline technical solutions provider with 80 years of operational experience. We deliver an exceptional array of integrated MRO solutions for airframes, engines and components, along with technical management, financing solutions and training.

As part of a strong and growing international MRO network we build long-term partnerships with a diversified global customer base that includes flagship and low-cost carriers, aircraft leasing companies, stockists and traders as well as original equipment manufacturers.

Our flexible solutions provide tailor-made combinations of all or any of our services. By meeting your individual requirements, your customized integrated package will significantly enhance your business efficiency and give you a true competitive edge.

Understanding your needs

We analyze your individual maintenance needs in light of your operational and commercial requirements and in-house capabilities. Based on this, we provide optimal maintenance services that ensure the highest levels of reliability and safety, with the quality and flexibility SR Technics' customers can expect. All our facilities give you the superior quality of service developed over decades of providing maintenance to the world's most demanding airlines.

AIRCRAFT SERVICES BENEFITS

How we can add value

Experience and efficiency

- › Profound industry knowledge and long-term relationships with aircraft manufacturers and OEMs
- › Experience of managing customer fleet operations on a daily basis, ranging from small to complex, and from flag carriers to low-cost carriers and cargo operators
- › Full-service MRO providing a combination of airframe, engine and component maintenance services in integrated packages

Engineering skills that earn their name

- › Innovative repair and modification solutions that reduce costs and enhance fleet performance
- › Troubleshooting engineering to recover aircraft in case of AOG worldwide in the shortest possible time
- › Technical consulting services to maximize the value of your assets both mid- and long-term

Lower costs and higher reliability

- › Cost-efficient handling of all your operational requirements across the entire aircraft supply chain – in-house or external
- › Minimized downtime and costs through targeted and proactive solutions based on our culture of continuous improvement
- › Reliable and effective commercial support for customers, designed to improve your financial situation

WHAT OUR CUSTOMERS SAY:

“I am extremely happy with the work and attitude of SR Technics’ team. The people involved in the IL-Checks are some of the most knowledgeable I have met in the aircraft industry.”

Mark Marshall, Project Engineer Base Maintenance, easyJet

SERVICES

Keeping your assets in the air

SR Technics delivers everything you need to keep your aircraft operational. We cover every aspect of operation for Airbus and Boeing models from aircraft delivery through lifelong maintenance to final phase-out from your fleet.

Maintenance (line, base and heavy)

- › Comprehensive maintenance packages on a single- or multi-event basis for line, base and heavy maintenance
- › Innovative maintenance models, which increase aircraft availability by reducing ground time (e.g. E-Check concept)
- › Continuously improving turnaround times for maintenance checks based on efficient processes and lean management

Field assistance

- › Aircraft AOG recovery worldwide with maintenance and engineering support for airframe, engines and components
- › Maintenance Control Center (MCC) and troubleshooting providing 24/7 support

Engineering

- › Fleet technical management covering EASA Part 145 and Part M engineering and planning
- › Design engineering for complex tasks such as cabin modifications based on EASA Part 21
- › Technical consulting for aircraft life cycle services, assessment services, and asset management
- › Maintenance support engineering, reliability engineering, and management

Additional services

- › Extensive workshop capabilities: composite and interior, sheet metal and structural components, upholstery and painting
- › Advanced analysis tools such as non-destructive testing (NDT) and borescope inspection
- › Aircraft type training provided by our technical training organization

WHAT OUR CUSTOMERS SAY:

“The professionalism and optimum effort they used when getting our aircraft back into operation convinced me that we had made the right choice with SR Technics.”

Benoît Cosseron, Technical Director,
Air Caraïbes Atlantique

SERVICES

Integrated Airline Solutions (IAS)

Outsourcing for new economies of scale

The Integrated Airline Solutions offering provides increased efficiency by using a tailor-made combination of aircraft, component or engine services, integrated with your operation through our Fleet Technical Management service. This is the solution of choice for operators seeking a one-stop shop approach: cost-effective, bundled services that scale up to deliver complete subcontracting of all your technical services needs.

It's your choice. Select the individual services you need from our portfolio, or opt for Integrated Airline Solutions and move into whole new economies of scale. With years of experience of both types of relationship, we can help you decide.

COMMERCIAL

Tailored pricing models

Our commercial options let you select the structure that delivers the greatest benefits to your organization – based on the services chosen.

Event-based fixed price

Providing a reasonable balance between cost and risk – with predefined fixed prices per event

Fixed monthly fee

For ease of planning and budgeting of availability services, and to remove the element of surprise

Time & material

Ensuring the highest transparency for single events

CAPABILITIES

Some capabilities are only carried out at certain locations. Further capabilities may be available upon request.
