Editorial

Dear Reader,

As the SR Technics technical training team celebrates its 50th anniversary, I am delighted to announce a number of exciting developments taking place that provide real added value to you.

The first of these is the expansion of our services to include vocational training into our product offering. This is a major step which means that we are able to seamlessly provide you with the complete range of technical training to suit every need, from the basic skills to the latest in high-tech training applications.

Secondly, and further demonstrating our commitment to our customers, we have continued to expand our product portfolio. A number of new courses have been added to our range, some of which you will notice take us even beyond the purely technical domain to meet the needs of the aviation industry even more comprehensively.

Thirdly, reflecting the world-wide focus of our business, I am pleased to introduce Daniel Hepfer, our new Head of Sales and Commercial Services. An expert in international business development, Daniel has a number of years practical hands-on management experience in Europe and Asia. Leading our sales and administration teams, Daniel is looking forward to discuss your training needs.

These are just some of the topics in this edition of our newsletter. If any of them are of special interest, we would be delighted to hear from you.

With best regards,

Markus Buergin

Head of SR Technics Training

Vocational training at SR Technics

Apprenticeships, Licensed Engineers, Specialised Training

Most organisations in the industry are concerned about the provision of skilled manpower. Those companies wishing to do something about it can now act, with us as a provider, to establish an apprenticeship scheme of their own. SR Technics has extensive expertise in this field and has training programmes covering all aspects of aeronautical engineering. The existing vocational training section in Zurich, comprising over 150 apprentices, has now joined SR Technics Training Services. This means that we can now provide, in a seamless manner, an education for students coming from schools and colleges who wish to enter the aviation industry.

With the addition of vocational training we now offer a complete range of technical training – with obvious benefits to our customers.

A product portfolio to meet your needs

At SR Technics we listen carefully to customers. This has resulted in the expansion of our aircraft type training courses to include the Boeing 777. Other types will follow in due course. Providing courses that meet the requirements of tomorrow is vital. As the market changes, so our product portfolio is developed accordingly.

Additionally, our customers' feedback indicated a growing need for courses that many consider to be on the periphery of technical training but none the less essential. To meet those demands we have developed and introduced courses such as Technical Aviation English and Health and Safety. Most courses are conducted in a true "blended learning" manner, providing all the advantages of linked instructor-led and computer-based training.

Web-based learning for improved efficiency

With the winter season started, it is often difficult for maintenance organisations to release staff in order to attend training, no matter how pressing the need may be. To meet this challenge, SR Technics Training Services offers many courses in a web-based format that permits access whenever the student has the need – and in particular – the time. Naturally, we still offer training courses at our sites or customer facilities for added convenience. Please contact our sales team to discuss the solution best suited to your needs.

Daniel Hepfer joins SR Technics Training Services as Head of Sales & Commercial Services

We are pleased to announce that Daniel Hepfer has joined us as Head of Sales and Commercial Services. Daniel is a specialist in international business development.

His expertise was acquired during several years of hands-on management experience in Germany, Switzerland, and Asia. For the past five years he has been living in China, working as a management consultant and chief representative of a Swiss-based corporation. Daniel is now employing his international business experience, strategic thinking skills, and project management expertise to work with our sales and administration teams at SR Technics Training Services to optimise our offerings for you.

Daniel would be happy to discuss your views and requirements. To get in touch, please contact him as follows:

Phone: +41 43 812 66 99

Visit us

Here is a list of the events SR Technics will be attending over the next few months. Please visit us at our stand to discuss your training needs.

- Singapore Airshow:
February 2 – 6, 2010
Stand C01 (Mubadala stand)
- MRO Middle East :
February/March 28 – 1, 2010
Dubai
Stand 505
- EAMTC Meeting:
March 23-24, 2010
Toulouse

Upcoming training courses

Basic maintenance training (EASA Part-66) classroom

Cat. B1 Series

9 Human Factors B1/B2	Dec 11 – Dec 14, 2009	ZRH
10 Aviation Legislation B1/B2	Dec 15 – Dec 17, 2009	ZRH
17 Propeller B1	Dec 18 – Dec 22, 2009	ZRH
8 Basic Aerodynamics B1/B2	Feb 08 – Feb 09, 2010	ZRH
6 Materials and Hardware B1	Feb 10 – Feb 17, 2010	ZRH
7 Maintenance Practices B1	Feb 18 – Mar 02, 2010	ZRH
5 Digital Techniques/Electronic Instrument Systems B1	Mar 03 – Mar 08, 2010	ZRH
11 Aeroplane Aerodynamics, Structures and Systems B1	Mar 09 – Mar 25, 2010	ZRH
15 Gas Turbine Engine B1	Mar 26 – Apr 07, 2010	ZRH
9 Human Factors B1/B2	Apr 08 – Apr 09, 2010	ZRH
10 Aviation Legislation B1/B2	Apr 12 – Apr 14, 2010	ZRH
17 Propeller B1	Apr 15 – Apr 19, 2010	ZRH

Cat. B2 Series

8 Basic Aerodynamics B1/B2	Feb 15 – Feb 16, 2010	ZRH
5 Digital Techniques/Electronic Instrument Systems B2	Feb 17 – Feb 23, 2010	ZRH
6 Materials and Hardware B2	Feb 24 – Mar 01, 2010	ZRH
7 Maintenance Practices B2	Mar 02 – Mar 08, 2010	ZRH
10 Aviation Legislation B1/B2	Mar 09 – Mar 11, 2010	ZRH
13 Aircraft Aerodynamics, Structures and Systems B2	Mar 12 – Mar 31, 2010	ZRH
9 Human Factors B1/B2	Apr 06 – Apr 07, 2010	ZRH
14 Propulsion B2	Apr 08 – Apr 09, 2010	ZRH
