

CALIBRATION SERVICES

CALIBRATION SERVICES

Introduction

SR Technics is a leading provider of technical solutions to the aviation industry. We run our own calibration laboratory offering high-quality services to airlines, MROs, and industrial customers.

The calibration laboratory performs electrical and mechanical calibration as well as length measurement of precision equipment.

The following pages give an overview of our offering. Please contact us for a quotation or for more information.

HIGH QUALITY STANDARDS

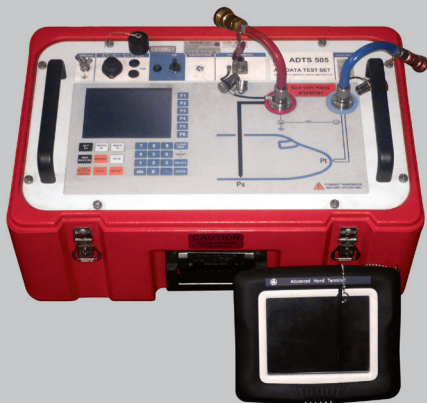

Your benefits

The combination of technical excellence and commercial thinking enables us to offer a range of benefits:

- › **Attractive pricing:** reliable quality services at an advantageous price-performance ratio
- › **Short TAT:** outstanding process capability delivers excellent turn around time performance ranging from same day express service to standard orders returned in five to seven working days (shop in/out) 365 days per year

All calibrations provided by SR Technics are fully traceable to national or international standards, and documented accordingly (certificate, shop finding and protocol). Calibrations are performed in accordance with ISO 9001, ISO 10012 and ISO/IEC17025, and the laboratory is recognised and accepted by EASA, the FAA, the FOCA, and many other national authorities.

The laboratory is equipped with state-of-the-art technology. Its team of experienced and highly qualified technicians undergoes regular training, ensuring that they are always able to service the latest equipment.

SERVICE CATALOGUE

Our services

In order to satisfy individual customer requirements, we offer a choice of two maintenance concepts:

- › Interval established by the customer – the customer is responsible for compliance with calibration intervals
- › The customer is informed by SR Technics when the next calibration is due

Please note that customers are responsible in all cases for equipment transport.

Calibration by SR Technics includes the following services:

- › Basic cleaning
- › Verification
- › Test sticker
- › Calibration certificate
- › Shopfinding report
- › Measurement protocol
